

US President Biden's Visit: All Updates & Broadcasts from All Locations Now on One Site

The Israel Government Press Office (GPO) will operate a mini-site – in real time, including live broadcasts, photos and documents – for the hundreds of Israeli and foreign journalists that are expected to cover the event.

As part of the extensive operation to cover US President Joe Biden's visit to Israel, the GPO has established a special mini-site entirely devoted to the Presidential visit that will include live broadcasts from all visit locations as well as other content that will be constantly uploaded and updated.

Hundreds of journalists from around the world have begun to arrive in Israel ahead of US President Biden's visit and have been processed by the GPO, which will be at their service until they leave the country upon the conclusion of the visit on Friday.

The dedicated site will provide rapid and updated service for the many media crews that will be able to livestream the Presidential visit to their networks and download updated print and digital stills photographs and background material.

The mini-site is in addition to the GPO international press center at the [Mishkenot Sha'ananim Cultural and Conference Center](#) in Jerusalem, close to the sites of the visit, that will allow journalists to closely follow all of the events.

Entry to the dedicated mini-site, is via the regular GPO site:
